DETAILED ACTION

Election/Restrictions

Claims 6-12 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 10302003.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-5 are rejected under 35 U.S.C. 102(b) as being anticipated by Minoura [US 5,038,050].

Claim 1, a relay unit [figure 4] with:

a plurality of relays [figure 4, the squares with the coil and switch inside]; and

a power supply bus bar [15] supplying power supply current to said plurality of relays;

wherein said power supply bus bar allows power supply current to be supplied to the plurality of relays via respective fuses [20].

Claim 2, each of said relays includes a pair of switch connector circuit components between which a relay switch element is intervened and a pair of coil connector circuit components between which a relay coil element is intervened, wherein

Art Unit: 2832

one of the switch connector circuit components is formed with a downstream fuse connector portion to which each of the fuses is electrically coupled and a relay terminal to which a connected is electrically coupled [figure 4].

Claim 3, the other one of the switch connector circuit components and the pair of coil circuit are formed with relay terminals to be electrically connected to relevant connectors, respectively [16, figure 4].

Claim 4, the power supply bus bar is located at an inner surface of a unit case [figure 3, col. 3 lines 21-23].

Claim 5, the power supply bus bar is formed with an upstream fuse connector portion; and the downstream fuse connector portion formed on said one of the switch connector circuit components and the upstream fuse connector portion formed on the power supply bus bar are located in an opposed relationship to form a pair of fuse connector components [figure 4].
